

419-01A Perimeter Anti-Theft Alarm
Description and Operation

2019 Ranger
Procedure revision date: 07/15/2015

Perimeter Anti-Theft Alarm - Overview

Overview

The perimeter alarm system deters unauthorized entry into the vehicle by sounding the horn and flashing all the turn signals and interior courtesy lamps. When an unauthorized entry occurs, the horn and lamps activate for 30 seconds. After 30 seconds, the horn stops sounding, but the lamps continue to flash for up to 5 minutes.

The panic alarm is fitted on selected markets only and operates similarly to the perimeter alarm, but only activates using the panic button on the RKE transmitter. The panic alarm feature only operates when the ignition mode is off.
